May Bird Census

F. MAY TUTTLE, OSAGE, IOWA.

In order that you may reconcile my list with town life, I feel that an explanation is necessary. Our home is located on two good sized lots, near the out-skirts of town. Just outside the west window in the kitchen, where much of my time is spent, are two plum trees, a concrete bird pool, berry bushes in an adjoining yard; and in other parts of the yard are hard maples, apple and evergreen trees, so that conditions are favorable for bird-life in abundance. The Martin house was erected early in May but the birds failed to find it until Decoration Day. The Western Meadowlark that I hear almost every day sings on a pasture fence two blocks south of our home. In every case where the locality is not mentioned, I saw the birds in my own door-yard.
